EXPERIENCE

THE LAND

A thousand years ago, the lands beneath Chimney Rock's twin pinnacles were home to the Ancestral Puebloans. Later, the formations served as a landmark for the European explorers and prospectors who settled this rugged country. Today, the prominent and beautiful spires mark one of the most intriguing archaeological sites in the Four Corners area.

Located 17 miles west of Pagosa Springs, Colorado, Chimney Rock's stone pinnacles overlook an ancient pueblo on lands managed by the San Juan National Forest.

ENVISION

THE PAST

Larason

The unique site known today as Chimney Rock was proclaimed a National Monument September 21, 2012. Architecture, pottery, and other artifacts from the site tell of the daily lives of the people who made the area their home 1000 years ago. Among hundreds of structures, a Chacoan Great House Pueblo, Great Kiva, multi-family dwelling, and pit house have been excavated and stabilized for viewing.

EMBRACE

THE LEGENDS

Mysteries, legends, and theories about Chimney Rock abound: Why did agricultural people develop a large community in a harsh environment? What attracted them to the high mesa beneath the twin pinnacles? Was Chimney Rock an outpost for collecting wood or wild game for use in Chaco Canyon? Chimney Rock is the most isolated and remote community tied to Chaco as well as the highest in elevation. "What brought the Chacoans here and why did they leave?" are perhaps the most asked questions.

Just as their ancestors called Chimney Rock a special place, modern Puebloan cultures consider it a place of spiritual significance.
